

PDFX-ready Workflow V2.5 – Preflight files for Adobe Acrobat 9 and X as well as XI and DC

Prerequisites for Acrobat 9 and X Pro

- Preflight profile “PDFX-ready Sheetfed Offset CMYK V25 (PDF_X-4) for Acrobat 9+X.kfp”
- Preflight profile “PDFX-ready Web Offset CMYK V25 (PDF_X-4) for Acrobat 9+X.kfp”
- Preflight profile “PDFX-ready Newspaper CMYK V25 (PDF_X-4) for Acrobat 9+X.kfp”

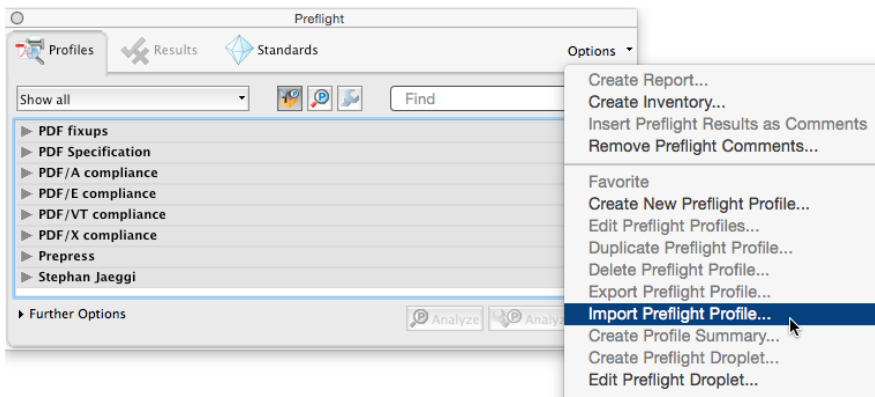

Prerequisites for Acrobat XI and DC Pro

- Preflight profile “PDFX-ready Sheetfed Offset CMYK V25 (PDF_X-4) for Acrobat XI + DC.kfp”
- Preflight profile “PDFX-ready Web Offset CMYK V25 (PDF_X-4) for Acrobat XI + DC.kfp”
- Preflight profile “PDFX-ready Newspaper CMYK V25 (PDF_X-4) for Acrobat XI + DC.kfp”

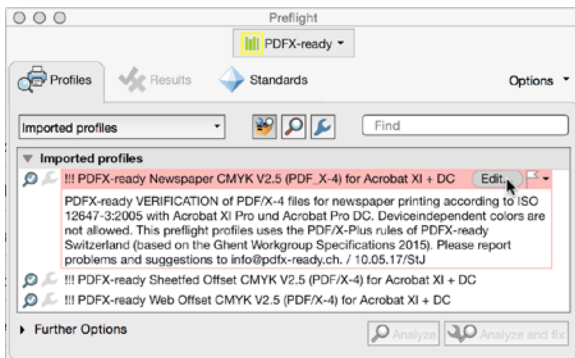

Depending on the desired printing process its only necessary to import the corresponding profile.

Import Preflight Profiles

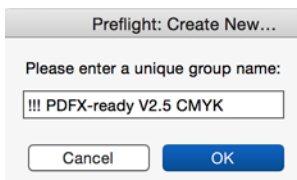

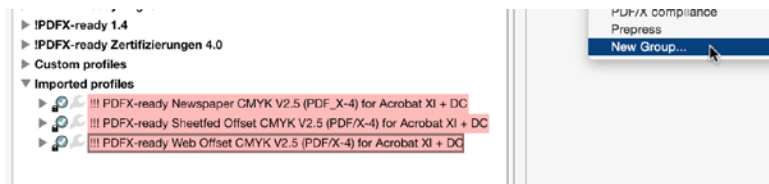

- Acrobat 9 Pro: **Advanced -> Preflight... -> Options -> Import Preflight Profile...**
- Acrobat X / XI Pro: **View -> Tools -> Print Production -> Preflight... -> Options -> Import Preflight Profile...**
- Acrobat Pro DC: **View -> Tools -> Print Production -> Open -> Preflight... -> Options -> Import Preflight Profile...**

The profiles are automatically stored in the group “Imported profiles”. Click on **[Edit...]**:

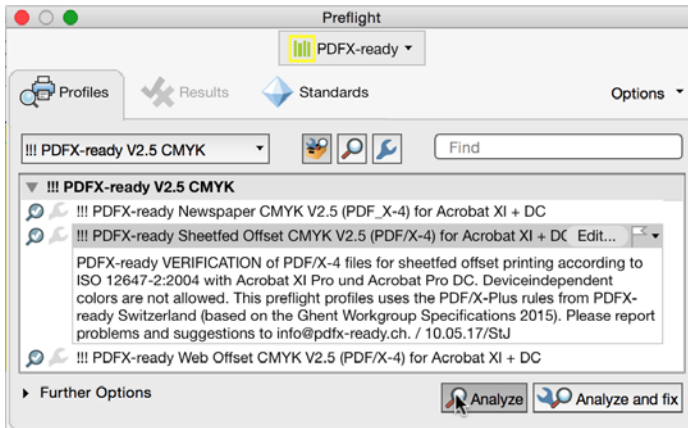

Transfer the profiles to a new group “!!! PDFX-ready V2.5 CMYK” in the Edit window:

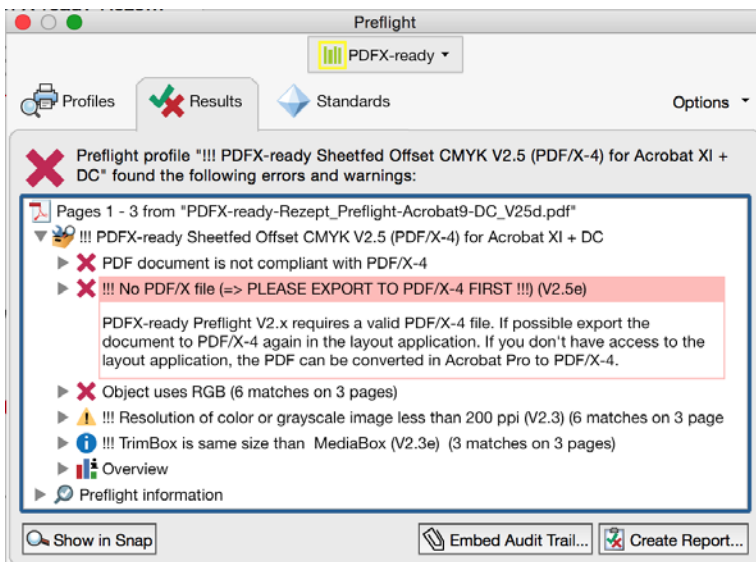

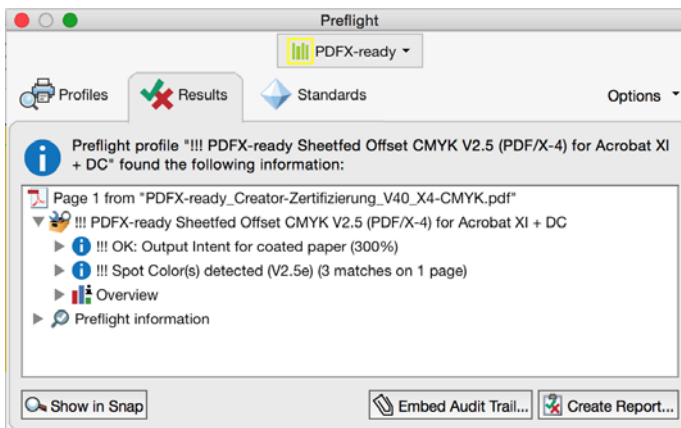

Execute a Preflight Profile

Select the preflight profile for the desired printing condition and click on **[Analyze]** to check your PDF:

The results are display in the **Results** window:

INFO

- This recipe was created based on Adobe Acrobat DC.
